Tursber, Dec 16-P. M. At the opening of business this merning the Steel narket exhibited, with some exceptions, the neavy features which have ruled for several days past, but closed with firmness. At the Second Board there was a marked reaction, with a strong disposition to buy, expecially on time. For thirty and setty days, buyers options, nearly double the newal difference was in some cases paid. The reaction was the result of the diminished stringency in money, and the impression that the improvement would continue. Erie was sold as low as 60 before the Board, but at the close was 61 a 61 ], which is } # cent improvement on yesterday's closing prices. The business of December continues to be very large. Reading improved from 83, at which it closed yesterday, to 841. The divi-dend question appears to be settled so far as both a cash and stock dividend is concerned. There will be

but one dividend, the President being in favor of cash, and the Directors, or a large majority of them, desiring a stock dividend. The President is understood to have declared that if a stock dividend is declared, that have declared that if a stock dividend is declared, that he will resign. The floating debt is atated unofficially at \$1,700,000. Hudson River fell off to 291. The President of this Company expresses the opinion that the loss by the fire at Greenbush depot cannot exceed \$50,000, and will not probably be as much. In Western shares the market was very heavy until the Second Board, when there was a large recovery in some descriptions. The mos violent changes were in La Crosse, which fell off to 80 at the morning Board and recovered to 82 at the Second Board. The cause of the decline in the morning was the sales by parties under a rumor that Mr. George Law had closed a contract with the Company for the construction of the Western division. This being unsatisfactory to them, they put their stock on the market. There was no truth in the ru mor, however, and the same parties endeavored to purchase their stock back again at the Second Board. Milwaukee and Mississippi sold at 78. The dividend is certain to be 5 ? cent. Michigan Central was 98; an improvement of | P cent. The dividend was de clared at Boston to-day, 5 & cent, payable 2d of January. Michigan Southern improved to 882; Toledo was firm, and closed at 732 274; Galena was very heavy in the morning, and declined under forced sales to 1162. At the Second Board, however, buyers came in, and 118 was bid. Illinois Central feel off to 118, but closed at 1194. Cleveland, Columbus and Cinennati sold at 108, under the impression that an extra dividend is to be declared. Book Island closed at 104. The business in Railroad Bonds was mainly in Illinois

sold at 95. The mail for the Boston packet has not been a large one, and the Exchange market closes | @ | P cent easier than for the previous steamer. The stringency of money has prevented importers from remittie; freely. The bankers were anxious to draw at curren rates. Commercial bills sold at 81 281, and backers' at 81@9 P cent, less brokerage. The supply of bills is considerable. France are 5.23 7 25.184.

The Directors of the Michigan Central Railroad me to-day, at Boston, and declared a semi-annual dividend of 5 P cent, payable on the 2d January, prox. The becks will close on the 20th December. It was thought that the dividend might be 6 \$\text{P}\$ cent, but the B ston managers, we understand, were opposed to it.

A proposition of settlement was made to-day by Mr.

Little to his creditors, and was received with considerable dissatisfaction. The payment he proposes is 25 P cent each within 30 days, and 75 P cent in notes at 9, 12 and 18 months, with interest.

The Bank of New-York has declared a semi-aunual

The books of the Atlantic Mutual Insurance Company will close on the 31st of the present month, preparatory to making its annual statement.

The Ohio State 5 and 6 P cent Loans, redeem after Dec. 31, 1856, will be paid in full, principal and interest, on the second day of January, 1857, at the office of the Ohio Life Insurance and Trust Company, No. 25 William street, by Samuel T. Bull, esq., Onio State Agent. The Money market to-day shows a marked relief

from yesterday, but the demand is still very active, and the market cannot be pronounced only. The orivate hand are are lending more freely, and some of the Banks feel stronger, and are disposed to be more liberal with their dealers.

In the produce market there is not a very vigorous

movement, but there is some speculative demand for Flour, which, with the shipping inquiry and light receipts, has again advanced the market 5c per bbl. Wheat is also better, but the transactions are light. Pork is heavy, and not active. In Groceries there is some activity at full prices, including a cargo of 4,200 begs Rio Coffee on private terms. The weekly circu-

bags Rio Collect on private terms.

The anotion sale of 5,100 bags Rio and Santos on the 16th instattracted a good company, and passed off with some spirit at an advance of ic. on prices of the previous week; 2,500 bars Rio were sold from 94010jc, averaging 2 94c, per lb.; and 978 bars Santos, at prices from 10 0012, averaging 11c, per lb. Subsequently, there has existed a fair demand at full rates. 1,70 bags Si. Domingo were taken for export yesterday at 10c, per lb., cash. A sale of 2,300 bags Bahia has also been made is ear, port, at 94c, per lb., cash. There is a fair ladjury for other sinds

steady prices.

Green Tens are scarce in first hauds, the recent transactions having been large. The market is firm both for Greens and Blacks. Cotton has again advanced ic. with a moderate demand; Middlings are quoted at 121@127. The sales of the week are 9,000 bales and the stock 50,000 bales. The Southern markets are active and improving in view of the impression that the present crop is not equal to the wants of the world. The week's receipts at all the ports is 120 000 bales against 144,000 last year, and the aggregate is now 1,068,000 bales against 1,108,000, showing a failing off of 40,000 bales. The exports show a decrease of 257,000 bales, of which 175,000 bales is to Great Brit-

237,000 bales, of which 175,000 bales is to Great Britain. The general estimates of the crop are still rather under three miltions bales. The Greular of Mesers. Wright for the steamer says:

Chor.—The spinions from the South confirm the belief in a crop somewhat short of 3,000,000 bales. The result of the pickings from individual planters are so numerous, and so uniformly below those of last year, that I find many parties who have, thus far, been strong advocates in a crop exceeding

3,000,000 bales, yield the point, and perhaps lean too much toward the opposite extreme.

RECRIFTS, though will free, are below last year, and below the corresponding week in 1852. At the interior markets in Georgia and Alatama, they are falling off rapidly.

Exposite a term a moderate scale for this late period of the reason; to Great Briann for the week, 40,000 below, against 60,646 bales, last year, and 44,000 bales for the corresponding week is 1855. The total to Great Britain shows a descript of 175,000 bales, as compared with last year, and 195,000 bales compared with last year, and 195,000 bales compared with last year, and the fulling off in quality at the ports of New Orleans, Savannah and Chuleston.

The following is a entisement of the movement in Cotton since the let September bast, as compared with the previous four years:

expires on the first day of January next. The Legislature of the State of Indiana at its session in 1854 and '55 passed an act creating a new bank under the name of "The Bank of the State of Indiana," with an auberized capital of \$6,000,000, and power to create 20 branches, which branches have been judiciously loeated throughout the State. The charter is a safe and liberal one; may be made useful to the public and profitable to the shar-holders; is in many respects similar in its previsions to the charter of the old Bank. In the present State Bank the State of Indiana owns about one-balf its capital stock, individuals the other half. In the new Bank the State owns no part of the cap tal stock. Under the Constitution of the State no other bank can be created excepting under the Free Back State Stock system. Two millions of the capital stock in the new Bank has been taken, with power to increase the same from time to time to \$5,000,000; and the Bank will commence operations on the 2d of January next. Most of the branches of the new Bank have got into the hands of parties owning and controlling the branches of the old Bank, so that the old branches are absorbed quietly into the new. It is to be hoped that the new Bank will be managed as successfully as the old. But few Banks in any State stand higher than the State Bank of Indiana. In 1834-5, the State of Indiana borrowed \$1,390,000 to pay for her stock in the State Batk. The result of this investment is, that after the payment of the above loan, principal and interest, there will be a clear net profit to the State of about \$2,000,000, which, by the terms of the cuarter, goes to the School Fund of that State. When the present bank went into operation, the population of the State was some 300,000 souls, and about one hundred millions of taxables. Now the popula tion is near twelve hundred thousand, and the taxables about \$450,000,000. The operations of the bank has aided much in bringing about this state of prosperity. Hugh McCullech, esq., is President of the new bank, and James M. Ray, esq., Cashier. Those gentlemen have been connected with the old State Bank from its organization-the former as cashier of the branch at Fort Wayre the latter as cashier of the State Bank at Indianapolis, both men of eminent ability, and posses ing the confidence of the people of that State We cut trem The Madison (Ind.) uan, of the Superior Court, desided that sales man, of the Superior Court, desided that sales of produce or merchandise deliverable at a future day, with no intention of the parties actually to perform it, but merely to pay difference on the one side or the other, according to the state of the market, such contract is a wager, and, therefore, void. This decision of Judge Hoffman places contracts in provisions, where differences are only maderated to be paid in fulfillment of the contract, upon the same footing as contracts in stocks, and declares them without the pale of law. The decision is very lengtay, and will be given in detail, being important to the trade at large.

The Hartford, Providence and Fishkil Railrand Company had their annual meeting in this city on Wednesday. The Directors chosen for the ensuing year were Byron Sprague, W. W. Hoppin, James G. Antheny and Henry Lippitt, of Providence; Stephen Harris, jr., of Phonix; Charles H. Warren, of Boston; Jeseph Irumbull, Wm. H. Imlay, affed Smith, and Calvin Day, of Hartford; and John P. Eiton, of Waterbury. Byron Sprague, esq., was elected Pres dent for the ensuing year, and Edward M. Bridgeman Secretary and Treasurer. The gross examings for the year ending Oct. 1, 1856, were \$340,598 05; expenses \$171,160 24; not earnings from operating the road, \$169,437 81. The following is a statement of the financial cordition of the Company on the 1st of October 1856:

Asse 2. \$4,225,170 11 Liabilities 4 099,997 25 Excess of assets..... \$194,262 85

The ruthing expenses have been near 50 3-10ths eent of the gross receipts.

At a meeting of the Board of Directors of the New-

Jersey Zine Company, held in Jersey City on the 13th inst., the fillowing named gentlemen were elected officers of the Company for the ensuing year: William Redmond, President; John E. Porbes, Vice-President; Andrew P. Pilot, Treasurer; Henry Aitken, Secretary. A dividend of 8 P cent on the pre-ferred stock of the Company was declared, payable on and after the 5th of January next.

A letter from Milwaukee, dated Dec. 4, says that the snow lies deeper than for many years before in W scopein. We have already had two days of steady storm, and the morning of the third day opens with full vigor. The last clearances of the season have been made from Milwaukee. The total amount of Wheat shipped for the season is 2,097,000 bushels against 3 000,000 for last year. The amount of Wheat yet in the hands of the farmers has never been equaled at the close of navigation. The estimated amount of this year's crop still to go forward is 3,000 000 to 4,000,000 bushels, and there will probably be in store, ready for the opening of navigation, 300,000 bbias of Flour and 1,600,000 bushels of Wheat.
